

Series Q10 Large Chamber Liquid Level Gauges

Large Chamber Gauges are specifically designed for liquids which have the tendency to surge or boil. These gauges reduce the boiling effects of entrained gas. They help to reduce liquids being vaporized under critical low pressure and help to reduce boiling the liquids when temperature exceeds the boiling point. Series Q10 Gauges are available in both reflex and transparent applications. These gauges are designed with heavy wall steel tubing as a chamber, complete with sectional covers and gauge glasses. The final assembly of these gauges are specially processed, heat treated and tempered. Standard connections for these gauges are 3/4 inch NPT female end connections. Additionally, 1/2 inch or 3/4 inch NPT side connections are available. Also 2 inch flanged or scarfed for welding connections which provide unrestricted flow through the chamber, may be specified. All carbon steel parts are rust proofed.

Series Q10 Gauge Specifications

Lengths

Series Q10 gauges are available in nine standard visible glass lengths. Multiples of the same size windows (up to nine sections) in a single piece bar stock liquid chamber are used for longer lengths.

Connections

Standard Series Q10 Gauges are furnished with 1/2 or 3/4 inch NPT female end connections. Other connections available: 1/2 or 3/4 inch NPT female or male, side or back, flanged ends, side or back to suit mating connections.

Liquid Chambers

Machined from bar stock with recessed gasket seats.

Covers

All covers are manufactured to be interchangeable.

Bolt & Nuts

Alloy steel to ASTM Standards.

Glass

The tempered glass must be protected from corrosive substances such as caustic acid and hydrofluoric acid. Only transparent glass with mica or Kel-f shields must be used in these applications.

Gaskets

Precision die cut from the highest quality materials.

Protection

All carbon steel parts are coated both externally and internally with a high quality rust inhibitor. This coating serves as a superior bonding base for paint. It is recommended that all Q10 Gauges be installed with Quality Gauge Valves, having safety ball checks, which help provide protection against physical injury and loss of product should glass breakage occur.
